Education

Rajalakshmi Institute of Technology *B.Tech in Computer Science and Business System* *Sept 2023 – May 2027*
CGPA : 8.3 / 10

Sri Vijay Vidyalaya Matric Higher Secondary School *June 2022 – Apr 2023*
Percentage : 91%

Technical Skills

Back-End Development: Java, Spring Boot,SQL,Python
Front-End Development: React.js, JavaScript, HTML5, CSS3
Technologies & Tools: Docker,Redis,Git & GitHub, Pandas,Matplotlib,Seaborn,Telegraf
Key Courses Taken: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Experience

National Informatics Center (NIC) *June 2025 – Aug 2025*
SDE - Intern

- Built **real-time monitoring dashboards and alerts** for the DEMS platform, tracking performance metrics, system health, and endpoint availability.
- Optimized **REST APIs and backend pipelines**, reducing response time by **35%** and improving dashboard load speed.
- Designed a **scalable monitoring architecture** processing **10K+ events/day** with automated alerting.
- **Tech Stack:** React.js, Spring Boot, Java, REST APIs,Nginx

ErnestWell Business Solution
SDE - Intern *Jan 2025 – Apr 2025*

- Developed **scalable RESTful services** using **Spring Boot**, enabling efficient **frontend-backend data exchange** with **React** while maintaining consistent throughput under load.
- Reduced **page load latency by 75%** through **React render optimization** and **Spring Boot caching** for high traffic
- Improved **end-to-end response times** by refactoring **authentication flows**, optimizing **Spring Boot queries**, and eliminating redundant API calls.
- **Tech Stack:** React Js, Spring Boot, REST APIs, MySQL,Docker

Projects

ThrottleX (Java, Spring-boot, Redis, REST APIs, HTML, CSS, JavaScript) *link*

- Built a **Adaptive distributed API Gateway** using Spring Boot to secure and manage high-volume API traffic.
- Engineered adaptive rate limiting with Redis, Lua scripts, and Token Bucket algorithms for distributed traffic control.
- Implemented Circuit Breaker and fallback mechanisms, improving system resilience and resource utilization by **45%**.

TraceNova (**Java, Spring Boot, React Js, PostgreSQL,Apache Kafka**) *link*

- Developed a **distributed observability platform** to monitor microservices by collecting and processing logs in real time.
- Implemented a **asynchronous log ingestion pipeline** processed **5K+ logs/min**, reducing log processing latency
- Integrated a **bottleneck detection engine** to identify slow services automatically, reducing debugging effort by **30%**.

PingPolicy (Java, Spring Boot, Redis, PostgreSQL, React) *link*

- Developed a **microservices-based API contract monitoring tool** with polling, alerting, and contract registry services.
- Engineered a **JSON diff engine** to detect and prevent silent schema drift across distributed microservices.
- Implemented **scheduled polling** with Redis caching, reducing redundant network calls by **55%** maintaining accuracy.

Participations & Certifications

CodeChef: 3 (Division 2) with a peak rating of **1697** *link*
GeeksforGeeks: Solved **200+ problems**, overall score **574+** *link*
LeetCode: Solved **200+ problems** across DSA topics *link*
HP Life Foundation: Successfully completed the IT for Business Success course *link*
